

Real-time payments made easy

CICOD Voucher Management System is a platform that manages the end-to-end lifecycle of physical and virtual vouchers from generation to activation. The highly secure multi-top up service solution can be integrated with most business process applications depending on needs and is convenient and flexible for customers who top-up via the web, mobile app, or SMS platforms.

VOUCHER MANAGER

It is an option that ensures potential revenue generation through the prepaid service market. We manage millions of transactions in real-time while providing clients with auditing and tracking reports to facilitate effective decision making. The vouchers are easily generated in desired denominations, quantity, validity, variable expiry rules and are encrypted for safety during printing. The activation /deactivation of voucher batches can also be managed securely and efficiently to prevent revenue leakage and fraud.
